FACULTY OF AGRICULTURE

OUR FACULTY

We are a faculty that supports regional development by specializing in the field of industrial hemp, conducting scientific research, leading entrepreneurial and innovative projects through collaborations, managing and implementing change and development processes. We contribute to humanity, our country and our region by conducting advanced technology-based practices and innovative educational activities in plant and animal production.

As an institution that has proven itself in scientific research and cooperates with strong national and international stakeholders, we aim to provide a student-oriented, sustainable and accessible environment. Thus, by contributing to economic, social and cultural life, we aim to train agricultural engineers with modern application areas and scientific equipment.

Our university is a specialized university on "Industrial Hemp for Sustainable Bio Materials and Bio Energy" within the scope of regional development-oriented mission differentiation and specialization carried out by YÖK within the scope of mission differentiation and specialization. Courses related to our specialization area are included in our curricula and our students are provided with knowledge and equipment on Industrial Hemp.

CORE VALUES

- We respect human rights and universal values.
- We are loyal to national, spiritual and cultural values.
- We abide by the rules of scientific ethics.
- We attach importance to academic freedom and science.
- We adopt the rule of law, freedom of expression, equal opportunity, innovative, participatory, transparent and reliable management approach.
- We care about a student and employee-oriented education approach.

DEPARTMENTS

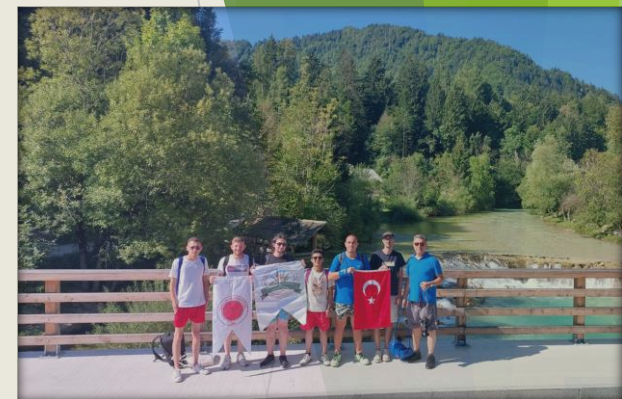

- Horticulture
- Plant Protection
- Landscape Architecture
- Agricultural Economics
- Agricultural Machinery and Technology Engineering
- Field Crops
- Soil Science and Plant Nutrition
- Animal Science

STUDENT SUPPORTED EDUCATION

A faculty with an understanding of the learning program that includes our students
In our faculty, students are involved in learning processes by doing TÜBİTAK 2209-A University Students Research Project.

STUDENT COMMUNITIES

- Agriculture, Environment and Community
- Education and Volunteers
- YOBU UNIKOP Student Community
- Badminton Community

Within the scope of the EU Youth Project through our societies, we contribute to the all-round development of our students who are sent to different countries in Europe.

OUR FACILITIES

- Research and Application Laboratories
- Computer Laboratories
- Climate Room
- Mushroom House
- Greenhouses
- Yerköy and Gedikhasanlı Application Areas
- Conference Room
- Reading Room
- Canteen
- Library
- Table Tennis Area
- All other facilities offered by the university
