

MISSION

MISSION

As Yozgat Vocational School, our mission is to ensure the training of qualified professional personnel needed by our country's labor market (industry, agriculture, and service sectors). We aim to develop technical staff equipped with theoretical and practical knowledge in their respective fields, embracing the requirements of humanitarian and professional ethics, and possessing full self-confidence, determined to advance our country in the globally competitive labor market. A management-service approach that closely monitors changes and developments in the professional field and readily conveys these innovations to students within the framework of the school-labor market integration is essential for this. Therefore, our indispensable priority is to cultivate technical staff who maintain composure and demonstrate the will to find solutions, rather than faltering and surrendering when faced with challenges encountered in every field, especially in the professional field.
